

DailyTracker v2 — User Guide

How to use every feature — for employees, team leads and managers

DailyTracker is your team's one place for attendance, tasks, daily reports, leave, WFH, expenses, payroll, chat and more. This guide explains each feature in plain words, with the exact steps to follow.

How to read this guide

- **Everyone** — sections 1 to 14.
- **Team leads and managers** — also section 15.
- All times in the app are **India time (IST)**, on every device.
- Menu names are shown like **HR & Requests → Leave** .

1 What's new

September – October 2026

Feature	What it does	Where
Comp-off	Working 4+ hours on a weekend or public holiday earns a day off.	Leave page
Expense claims	Send a bill; once approved it is paid with your salary.	HR & Requests → Expenses
Forgotten check-out	Reminder at 7 PM; the app closes the day for you and you confirm or correct it next morning.	Dashboard
Getting-started checklist	New joiners get a checklist and a buddy.	Dashboard
Excel downloads	Attendance, leave, reports, payroll and expenses as Excel files.	"Download Excel" buttons
Hand over approvals	A manager going on leave lets a colleague decide their team's requests.	Employee Requests
Safer sign-in	Sign-in ends when the browser closes (unless you trust the device) and after 30 minutes idle.	Sign-in page
India time everywhere	Every time (check-in, meetings, AI Help answers) is shown in IST.	Whole app

2 Getting started

Your account, signing in and security

Create your account

1. Open the app and choose **Create employee account**.
2. Enter your name, work email and a password. A code is sent to your email — type it in.
3. Your account now waits for a manager. When they approve it and give you a role, you can sign in.

Signing in

- Sign in with your **password**, or choose **Email OTP** to get a one-time code by email.
- **Trust this device** is off by default. Leave it off on shared computers: you are signed out when the browser closes. Tick it only on your own device — you then stay signed in on it.
- After **30 minutes without activity** you are signed out for safety.

Two-step sign-in (recommended)

Open **System & Docs → Security & 2FA**. Turn on an **authenticator app** (scan the QR code with Google or Microsoft Authenticator) or **email codes**. Keep your backup codes safe.

Your first days — the getting-started checklist

New joiners see a **Getting started** card on the dashboard with a progress bar. Some steps tick themselves when you do them in the app (profile details, face check-in, two-step sign-in, uploading a document, your first check-in); tick the others yourself. Your **buddy** — a colleague who helps you settle in — is named on the card.

Install the app on your phone: open it in Chrome and choose **Add to Home screen**. When a new version is released the app updates itself within a minute; you may see a “New version available” banner.

3 Your working day

Check-in, breaks, check-out

Check in

1. On the dashboard press **Check In**.
2. Allow location access. You must be at the office (within the distance your company set, e.g. 300 m).
3. If face check-in is set up, look at the camera for a moment.

On an approved **WFH** or **half day**, and on weekends and holidays, the location check is skipped. A late check-in may ask for a short reason.

Breaks

Start a **Tea**, **Lunch** or **Other** break and end it when you are back. Break time is not counted as work. Checking out ends a running break automatically.

Check out

Press **Check Out** at the end of the day. Your work hours = time from check-in to check-out minus breaks.

If you forget to check out

- At **7 PM** you get a reminder if you are still checked in.
- If the day is still open at **5 AM** next morning, the app closes it at your **last activity** (last task, support log, break or chat message) — or after a normal 8-hour day if that is later. Late work keeps its overtime.
- Next morning the dashboard asks you: press **That's right**, or **I finished at a different time** and send the real time with a reason. Your team lead or manager approves it and your hours are updated.

4 Tasks, goals and support

Planning and logging your work

Tasks

- Add tasks with a project, priority (High / Medium / Low), tags and time spent.
- Status: **In Progress**, **Completed**, **Blocked** or **On Hold**. Use the list or the Kanban board.
- **Task timer**: start / stop a timer on a task and the time is added for you.
- **Templates**: save routine tasks once; recurring ones appear on the right days and are added in one click.

Daily goals

Each morning set how many tasks and hours you aim for (a reminder comes at 9 AM). The dashboard shows your progress; **Goal History** shows the last 7, 14 or 30 days.

Support

Log help you gave a colleague (who, what, how long, with screenshots or files). Managers can assign support engineers to developers.

5 End-of-day report (EOD)

A short summary of your day

Open **EOD Report** and fill in what you did, blockers, tomorrow's plan, what you learned and your mood. Press **Auto-Generate Draft** to get a first version written from today's check-in time, hours and tasks — then edit it.

A reminder comes at **5 PM** if you checked in but have not sent it. Your manager reads it, rates it and may leave feedback; see it under **My EOD Reviews** .

6 Leave and holidays

Applying, balances and company holidays

Type	Per year	Notes
Casual	12 days	
Sick	7 days	
Earned	15 days	
Comp-off	As earned	Days earned by weekend / holiday work (section 7)
Unpaid	No limit	Deducted from salary

1. Open **HR & Requests → Leave** and press **Apply for Leave**.
 2. Choose the type, the dates and a reason, and submit.
- Weekends and public holidays inside your dates are **not counted**.
 - You can't apply for days you already have leave on. You can cancel a request while it is still pending.
 - Managers decide leave; you get a notification and an email.
 - The **Company Holidays** tab lists this year's holidays.

7 Comp-off

A day off for working on a weekend or holiday

- Work **4 hours or more** on a Saturday, Sunday or public holiday and check out → you earn **1 comp-off day**.
- It first waits for your team lead or manager to approve it.
- Approved days show on the Leave page (**Comp-off** card) with the date each one runs out.
- Use them by applying for a **CompOff** leave. Each comp-off day must be used within **60 days** of the day you worked; you get a reminder a week before one runs out.
- If the leave is rejected or you cancel it, your comp-off days come back.

8 Work from home and half days

Requests and approvals

1. Open **HR & Requests → WFH Requests**.
2. Choose **WFH** or **Half day** (first half or second half), the date and a reason.

Your team lead or manager gets a notification and an email with **Approve / Reject** buttons that work without signing in (the link is signed and expires). Approved days appear on the team calendar and skip the office-location check. **WFH Summary** shows your month.

9 Expense claims

Getting money back for work spending

1. Open **HR & Requests → Expenses** and press **New claim**.
 2. Enter the bill date, category (Travel, Food, Internet, Office, Other), amount and what it was for.
 3. Attach the bill — a **PDF or photo**, up to 5 MB — and press **Send claim**.
- Up to ₹1,00,000 per claim; bills up to 90 days old; no future dates.
 - Your team lead or manager approves it, or declines it with a reason.
 - Approved claims are paid with **that month's salary** — the payslip shows a separate **Reimbursements** line.
 - You can withdraw a claim while it is still waiting. Bills are private: only you and your approver can open them.

10 Reports and Excel downloads

Your history in the app and in Excel

- **History** — your past days: check-in, check-out, hours, breaks, tasks.
- **My Report** — any date range with totals, plus a monthly attendance calendar. Download it as **PDF**, **Word** or **Excel**; **Download month (Excel)** under the calendar gives that month's attendance.
- **Download Excel** buttons are also on the Leave page (requests, balances, comp-off), Expenses, and for managers on Employee Requests → Monthly and on Payroll.

Excel files have a frozen header row with filters; dates and amounts are real numbers you can sort and total.

11 Payroll and payslip

How your pay is worked out

Open **HR & Requests → Payroll** and choose the month. Download the payslip and print or save it as PDF.

Line	How it is calculated
Basic pay	Your full monthly salary
Overtime	Hours beyond your daily target (8 h by default) × hourly rate × overtime rate (1.5× by default)
Deductions	Absent days, unpaid leave, half days (½ day) and working days before your joining date × per-day rate
Reimbursements	Expense claims approved this month
Net pay	Basic + overtime – deductions + reimbursements

Paid leave, comp-off, approved WFH and holidays are **not** deducted.

12 Chat, announcements and kudos

Talking to your team

Chat

- Open the round chat button at the bottom right. Chat one-to-one or in groups.
- Send files and images, create **polls**, **@mention** someone, **pin** important messages and **search** old ones.
- You see who has read your message, and get notifications for new messages.

Announcements

Company news from managers; pinned ones stay on top. Mark them as read.

Kudos

Thank a colleague with a badge — Great Work, Team Player, Problem Solver, Mentor or Innovation.

Notifications

The bell shows reminders and decisions; the Notifications page keeps the full list.

13 Meetings and AI Help

Meeting notes, action items and the assistant

Meetings

- Create a meeting (Stand-up, Planning, Review, Retrospective, One-on-one or Other), set the date and time (IST), duration and attendees; it can repeat.
- Add notes and **action items** with an owner and due date; owners mark them done.

AI Help

- Ask things like “How many hours have I worked today?”, “Show my recent leaves” or “Draft my EOD report”.
- It can also do things for you — start or end a break, check in or out, apply for WFH or leave, create a task. It always shows a card to confirm first.
- Use the microphone to speak instead of typing.

14 Documents, training, reviews and exit

The rest of HR

- **Documents** — your offer letter, contract, ID proof, payslips, certificates and company policies. You can upload your own documents; managers can upload for you.
- **Training** — trainings you attend and certifications you hold, with dates and status.
- **Performance reviews** — when a review cycle starts you rate yourself; your manager then adds their review and the review is completed.
- **Resignation** — submit your reason and preferred last day. When your manager accepts it they set your last working day, and an exit checklist (laptop return, access removal, handover ...) is followed until your exit is complete.

15 For team leads and managers

Approvals, your team and administration

Employee Requests — one queue for everything

Manager → Employee Requests → Pending Queue holds leave, WFH / half-day requests, check-out corrections, comp-off and expense claims. Add a note and approve or decline. The **Monthly** tab shows team attendance (with Download Excel).

Who decides what

- A person's requests go to their own **team lead** (or manager); people without one go to every manager.
- Team leads decide only for their own team. **Leave** is decided by managers.
- Nobody approves their own request, unless there is no one else who could.

Going on leave? Hand over your approvals

On Employee Requests use **Hand over**: choose a manager or team lead and the dates (up to 90 days). For those days they decide your team's requests and get the notifications. A team lead covering for a manager can also decide leave. Press **Take back** to end it early.

Onboarding new joiners

Approving a new account on **Assign Roles** starts their getting-started checklist automatically. On **Manager → Onboarding** choose a buddy, tick your steps (laptop and accounts, welcome meeting), add or remove steps, and start checklists for anyone who joined in the last 90 days.

More tools

- **Team Dashboard** — who is in, WFH, on leave or not checked in today; each person's report and calendar.
- **Face Setup** — register or reset team members' faces.
- **EOD Reviews** (managers) — read, rate and comment on daily reports.
- **Payroll** (managers) — set salaries and overtime rate; team payroll with Download Excel.
- **System** (managers) — error log, weekly database backups, download and restore.

16 Automatic reminders and help

What happens on its own, and common questions

Time (IST)	What happens
5:00 AM	Days nobody checked out of are closed (see section 3)
5:15 AM	Weekend / holiday work becomes comp-off; comp-off expiry reminders
9:00 AM	Reminder to set your daily goal
9:30 AM	Managers: requests waiting more than 2 days
5:00 PM	Reminder to send your EOD report
6:00 PM	Reminder if you haven't logged your day
7:00 PM	Reminder to check out if you are still checked in
Weekly	A full backup of the database

Common questions

- **I can't see a new feature.** Wait a minute or refresh (Ctrl + Shift + R). Many menu items are inside a section — click the section name to open it.
- **Check-in says I'm too far from the office.** Turn on location / GPS and allow it for the site, then try again near the office.
- **Face check-in fails.** Face the light, remove glasses or a mask, and hold still. Ask your manager to reset your face if it keeps failing.
- **The app is slow to open the first time.** After a quiet period the server takes up to a minute to wake up.
- **A time looks wrong.** All times are India time; tell your manager if something doesn't match.
